

VIDEO 2 PC^{MK2}

USB VIDEO CONVERSION SYSTEM

Transfer your home movies to your computer and watch them anywhere!

VIDEO 2 PC is a video conversion system that captures and converts nearly any video and audio source. The result is quality digital videos on your computer. You can watch your videos on your computer, record them onto a DVD*, or load them onto your portable video player, such as PSP, iPhone or iPod. You can even upload your videos easily to Facebook or YouTube directly from the PC software to share them with friends, family or the world.

The included Cyberlink Power Director 8 DE software lets PC users edit, splice, add effects, add soundtracks, subtitles, voice overs and do everything you need to do make your video creations.

Mac users can use the included EzCap software lets you convert your videos. In addition, VIDEO 2 PC is compatible with iMovie and Quicktime (included with every new Mac) to fine tune and edit your videos.

For even those with almost no computer experience, VIDEO 2 PC is easy to connect to VCRs, camcorders, and most other video-playback sources. Simply plug in the three color-coded cables on one side and the standard USB jack to your computer, and you're ready to go. Get started today and convert all of your precious videos!
